DETAILED ACTION

Election/Restrictions

- I. Claims 1-10, drawn to an empennage assembly, classified in class 244, subclass 87.
- II. Claims 11-15, drawn to method of assembling a tail assembly to a model aircraft, classified in class 446, subclass 36.
- III. Claims 16-23, drawn to a device for attaching, classified in class 403.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method can be used on a hang glider.

Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the device can be used for a car model.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

Art Unit: 3644

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it can use glue. The subcombination has separate utility such as it can be used on a car model.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Frey on 3/16/04 a provisional election was made without traverse to prosecute the invention of group I, claims 1-10. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-23 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

This application is in condition for allowance except for the presence of claims 11-23 to group non-elected without traverse. Accordingly, claims 11-23 have been cancelled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior arts fails to show an empennage assembly with the fuselage having an opening at the bottom of the fuselage, a housing in the opening with an end defining an opening, a rod extending from the underside of

Art Unit: 3644

the vertical stabilizer, and the horizontal stabilizer having a hole aligned with the opening of the opening of the bottom fuselage, the housing and the rod.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tien Dinh whose telephone number is 703-308-2798. The examiner can normally be reached on 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Jordan can be reached on 703-306-4159. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
